Deferral Form for BIOS 399: Independent Research

If a student has not completed the project in the designated semester, but can reasonably complete the project in the following semester, the student may request a deferral. In order to be reregistered for BIOS 399 in the next semester, the student must attach a project update, called the Deferral Notice, to this Deferral Form. The Deferral Notice should be at least one page and must include the following information:

(1) a description of progress made in first semester.
(2) a detailed plan for completing the project in the subsequent semester.

This Deferral Form must be completed, signed by the faculty mentor, stapled to the Deferral Notice, and delivered to the departmental office at 3272 SES on Friday, May 4th no later than 12 PM.

TERM(S) REGISTERED FOR CREDIT (please indicate year(s)):

FALL ___________ SPRING ___________ SUMMER ___________

FACULTY SECTION

The student and I have discussed the steps needed to complete their project, and I am aware that they will be returning to my lab in the upcoming semester, which will allow them to receive an additional 2 credit hours for this course. I will issue a ‘DF’ grade for the semester (if affiliated with BIOS department).
